

# Automatic Spreading Machine

## PLUS-9

### Automatic Fabric Spreading Machine (Jeans/Woven)

#### PRODUCT DETAILS

- Ability to rewind the fabric
- GMT PLC system, easy to use touch control screen
- Programmable pastal length and number durable ergonomic chassis designed for heavy fabrics
- Fabric laying width between 160cm-280cm
- Ability to lay roll and open rested fabrics
- Wrinkle correction and fabric loosening feature with one button
- With fabric feeding system with conveyor belt and servo motor designed for heavy fabrics;
- Ability to lay fabric at the desired tension with automatic tension control
- Ability to lay fabrics precisely without stretching
- Waste free cutting system with automatic cutting adjustment
- Automatic pastal height adjustment
- Different speed options in different ways
- Automatic stop feature when the fabric is over
- Warning system when reaching the desired floor quantity
- Warning system in case of malfunctions to be happen
- Sensitive to electronic motion and side edge smoothness adjustment with photocell
- One-way and zigzag fabric laying with cutting apparatus and operator platform
- Speed adjustable cutting system
- Personal carrier platform with safety sensor

#### FEATURES

Standard laying width	: 160 cm - 280 cm
Standard roll dimension	: 70 cm
Standard roll weight	: 200 kg
Standard Relaxing Fabric weight	: 300 kg
Standard laying height	: 30 cm
Zigzag laying height	: 25 cm
Laying height with zigzag apparatus	: 25 cm
Maximum laying speed	: 100 mt / minute
General machine weight	: 490 kg
Electrical requirement	: 220 V AC 50 Hz 2 kw
