

Fabric Relaxing machine

Key Features

- Tension-Free Fabric Relaxing – releases fabric stress and shrinkage memory.
- Smooth Roll-to-Fold System – fabric can be processed from roll and delivered in neat folds.
- Adjustable Speed Control – speed can be adjusted according to fabric type.
- Automatic Edge Guiding (With Auto Edge Width) – keeps edges aligned during processing.
- Universal Fabric Compatibility – suitable for knit, woven, elastic, light & heavy fabrics.
- Stable & Heavy-Duty Structure – designed for continuous industrial operation.
- Low Noise & Easy Operation – user friendly control and low maintenance.

Technical Specification

MODEL	DM-2100-II / DM-2100E-II
Voltage	AC220V/50-60Hz
Power	0.55KW
Max Fabric Roll Diameter	350-400mm
Working Width	2100mm
Speed	0-35/min, Adjustable
Automatic Edge width	With
Input Fabric Type	Folding Or Rolling Fabric
Output type	Folding fabric
Measurement	Without
