

Suitable for
Knit, Woven, Elastic fabric and other general fabric

Key Features

- Smooth Roll-to-Roll Output – produces neat, tight rolls without wrinkles.
- Built-in Edge Cutting Unit – trims fabric edges for clean and even rolls.
- Adjustable Speed Control – speed range up to 0–30 m/min depending on fabric type.
- Stable Tension Rolling – prevents stretching or distortion, especially for elastic fabrics.
- Wide Working Width (2100 mm) – suitable for standard garment and textile rolls.
- Heavy-Duty Roller System – chrome rollers ensure smooth movement and long durability.
- Easy Operation & Low Maintenance – user friendly controls and simple servicing.

Technical Specification

MODEL	PGYL-2100F-EC
Max. Roll Diameter	40mm
Max. Fabric Width	2100mm
Speed	0-30m/min
Power	0.4KW
Voltage&Frequency	220V,50Hz
